ADAC survey 2011/ 2012: safety of motor scooters at holiday destinations

Dear Ladies and Gentlemen

With more than 18 million members, ADAC is the largest German and European automobile club and consumer protection organisation. For many years, we have implemented tests and analyses in the fields of safety, mobility and tourism. Since our members travel extensively throughout Europe, especially during the summer, we conducted 2011 a pan-European survey about service and safety of motor scooter rental companies at summer holiday destinations.

The test results will be presented to the public on 10 May 2012. To help you react to possible inquiries regarding the test results, the overall test rating and the most important positive or negative findings compiled by our testers after evaluating each motor scooter rental company are enclosed with this letter in the English version. You can also find detailed information on the Internet at www.adac.de.

Your scooter **Kymco Agility 125**, license plate **DX 22430** has achieved the overall test rating "**very good**".

If you are interested in details and individual test findings, we will be pleased to provide you with the requested information.

Yours sincerely

Robert Sauter
Head of Test Centre Mobility

Encl.

Sicily Moto Rent

ADAC Verdict: very good

Best in test

Place of rental:	Palermo/ Sicily/ Italy
Rental scooter:	Kymco Agility 125
Cubic capacity:	125cc
Mileage shown on odometer:	822km
Test date:	30 July 2011

Positives and negatives

- 😊 Scooter as good as new, well looked-after and without significant defects
- 😊 Directional flasher with acoustic signal
- 😊 As good as new, well-fitting jet helmet with visor
- 😊 €38 per day rental fee much lower than test average (€47.75/ 125cc scooter); no security deposit
- 😊 Rental agreement in local language and English
- 😊 Picked up with a full tank, vehicle documents and hand-over checklist; jointly checked for previous damage
- 😊 Call to emergency phone number was answered immediately
- 😊 Rental agency staff professional and friendly

- ☹️ Low rear tyre pressure; high beam control lamp out of order
